Mr. Haisheng Wu, Chief Executive Officer and Director of Qifu Technology, commented, “Although 2024 was a challenging year as macro-economic headwinds persisted, we have made timely adjustments to our operations throughout the year and focused our effort on improving the quality and sustainability of our business. With consistent execution, we closed the year with strong operational and financial results. Throughout 2024, we proactively expanded the scope of our platform services, which makes our business model more resilient and forms a solid foundation for high quality growth in 2025.

Approximately 58% of the year-end loan balance was under the capital-light model, ICE and total technology solutions. The strong contribution from non-credit risk bearing services helped us mitigate some risks in a challenging environment and demonstrated the efficiency of our platform services. In 2024, we further diversified our user acquisition channels and in the fourth quarter, approximately 47% of our new credit line users were acquired through embedded finance channels. Meanwhile, we continued to solidify our relationships with financial institution partners. With record-setting ABS issuance, we further optimized our funding structure.

While we started to see some tentative signs of improvement in user activities late in 2024, we will continue to take a prudent approach in our business planning in 2025. We will remain focused on quality growth and further empower our partners and users through our open platform. With the increasing maturity and efficiency of large language models, we expect to allocate more resources to the application of AI across the credit scenarios in the future. We believe such efforts will enable us to better navigate through the current environment and position us well to capture long-term opportunities through innovative technologies, enhanced products and collaborative models.”

“We are pleased to report another quarter of solid financial results and close the year on a strong note in a still uncertain macro environment. For 2024, total revenue was RMB17.17 billion and Non-GAAP net income was RMB6.42 billion,” Mr. Alex Xu, Chief Financial Officer, commented. “Meanwhile, we generated a record-breaking RMB9.34 billion cash from operations in 2024. Our strong financial positions not only allow us to consistently execute our strategy and support business initiatives, but also enable us to further enhance returns to our shareholders by actively executing 2025 share repurchase plan and significantly raising semi-annual dividends.”

Mr. Yan Zheng, Chief Risk Officer, added, “Despite facing macro uncertainties, we significantly reduced our overall portfolio risks through 2024 by decisively tightening risk standards early in the year. Overall risk performance reached the best level for the year in the fourth quarter. Among key leading indicators, Day-1 delinquency rate<sup>\*10</sup> was 4.8% in the fourth quarter, and 30-day collection rate<sup>\*11</sup> was 88.1%. We feel comfortable with current risk levels and expect to see relatively stable risk performance in the coming quarters as we seek growth opportunities in a changing environment in 2025.”

<sup>10</sup> “Day-1 delinquency rate” is defined as (i) the total amount of principal that became overdue as of a specified date, divided by (ii) the total amount of principal that was due for repayment as of such specified date.

<sup>11</sup> “30-day collection rate” is defined as (i) the amount of principal that was repaid in one month among the total amount of principal that became overdue as of a specified date, divided by (ii) the total amount of principal that became overdue as of such specified date.

### **Use of Non-GAAP Financial Measures Statement**

To supplement our financial results presented in accordance with U.S. GAAP, we use Non-GAAP financial measure, which is adjusted from results based on U.S. GAAP to exclude share-based compensation expenses. Reconciliations of our Non-GAAP financial measures to our U.S. GAAP financial measures are set forth in tables at the end of this earnings release, which provide more details on the Non-GAAP financial measures.

We use Non-GAAP income from operation, Non-GAAP operating margin, Non-GAAP net income, Non-GAAP net income margin, Non-GAAP net income attributed to the Company and Non-GAAP net income per fully diluted ADS in evaluating our operating results and for financial and operational decision-making purposes. Non-GAAP income from operation represents income from operation excluding share-based compensation expenses. Non-GAAP operating margin is equal to Non-GAAP income from operation divided by total net revenue. Non-GAAP net income represents net income excluding share-based compensation expenses. Non-GAAP net income margin is equal to Non-GAAP net income divided by total net revenue. Non-GAAP net income attributed to the Company represents net income attributed to the Company excluding share-based compensation expenses. Non-GAAP net income per fully diluted ADS represents net income excluding share-based compensation expenses per fully diluted ADS. Such adjustments have no impact on income tax. We believe that Non-GAAP income from operation, Non-GAAP operating margin, Non-GAAP net income, Non-GAAP net income margin, Non-GAAP net income attributed to the Company and Non-GAAP net income per fully diluted ADS help identify underlying trends in our business that could otherwise be distorted by the effect of certain expenses that we include in results based on U.S. GAAP. We believe that Non-GAAP income from operation and Non-GAAP net income provide useful information about our operating results, enhance the overall understanding of our past performance and future prospects and allow for greater visibility with respect to key metrics used by our management in its financial and operational decision-making. Our Non-GAAP financial information should be considered in addition to results prepared in accordance with U.S. GAAP, but should not be considered a substitute for or superior to U.S. GAAP results. In addition, our calculation of Non-GAAP financial information may be different from the calculation used by other companies, and therefore comparability may be limited.
