1 "Loan origination volume" refers to the total principal amount of loans originated through the Company's platform during the given period.

2 "Outstanding loan balance" refers to the total amount of principal outstanding for loans originated through the Company's platform at the end of each period, excluding loans delinquent for more than 180 days.

3 "Users with approved credit lines" refers to the total number of users who had submitted their credit applications and were approved with a credit line by the Company at the end of each period.

4 "90 day+ delinquency ratio" refers to the outstanding principal balance of on- and off-balance sheet loans that were 90 to 179 calendar days past due as a percentage of the total outstanding principal balance of on- and off-balance sheet loans on our platform as of a specific date. Loans that are charged-off are not included in the delinquency rate calculation.

5 "The percentage of funding from financial institutions" is based on cumulative loan origination during the given period.

6 "Repeat borrower contribution" for a given period refers to (i) the principal amount of loans borrowed during that period by borrowers who had historically made at least one successful drawdown, divided by (ii) the total loan origination volume through our platform during that period.

Third Quarter 2019 Financial Highlights

- Non-GAAP net income was RMB755.8 million (US\$105.7 million), an increase of 18% from RMB641.5 million in the same period of 2018.
- Net income margin was 28.4%. Non-GAAP net income margin was 29.3%, compared with 49.2% in the same period of 2018.

7 Non-GAAP income from operations and Non-GAAP net income are non-GAAP financial measures. For more information on this non-GAAP financial

measure, please see the section of “Use of Non-GAAP Financial Measures Statement” and the table captioned “Unaudited Reconciliations of GAAP and Non-GAAP Results” set forth at the end of this press release.

Mr. Haisheng Wu, Chief Executive Officer and Director of 360 Finance, commented, “We continued to achieve healthy and solid growth as we remain committed to executing our strategies in place. We have firmly implemented our strategic transition from a traditional loan facilitator to a technology enabler through the ‘capital light’ model. This transition allows us to serve more financial institutions and steadily reduce overall operational risk. Recently, we have observed regulatory tightening and market volatilities. We have always prided ourselves on our market leading position and ability to maintain high regulatory compliance standards. We have been actively working with regulators, industry associations and other leading companies to advocate for operating in regulatory compliance and protecting customer privacy. For example, we joined efforts with National Internet Finance Association of China to appeal for the establishment of an industry-wide anti-scam alliance. In response to the short-term market uncertainties, we expect to adopt a relatively conservative measure of customer acquisition, yet remain confident in meeting our full year guidance. In the long-run, we will continue to focus on the quality of growth and safety of operations, while maintaining a reasonable growth rate. We are committed to delivering greater value to all of our stakeholders.”

Mr. Jiang Wu, Chief Financial Officer of 360 Finance, stated, “Our solid operating performance in the third quarter continued to generate healthy financial results. In this quarter, loans originated under the ‘capital light’ model accounted for 20% of total loan originations, a significant increase from 8% in the previous quarter. It not only frees up more cash to support our daily operations and pilot projects, but also provides us with more of a cushion against industry headwinds down the road. Meanwhile, our customer acquisition has become more efficient to offset, to some extent, a decrease in margin as a result of our strategic transition. We remain committed to originating more on-balance sheet loans to better match revenue with cash flow as long as the costs of consolidated trusts are reasonable. In addition, we have been trimming down overall funding costs through strengthening long term relationship with our financial institution partners and diversifying our fund sources, such as domestic ABS market. For example, in July, we successfully issued RMB 1 billion of ABS with an attractive comprehensive cost at about 5.6%, despite the challenging domestic ABS market. More importantly, we maintained our prudent attitude towards risk management to ensure sufficient provisions for estimated credit risks.”

Mr. Yan Zheng, Vice President of 360 Finance, added, “We maintained our market leading risk performance with 90 day+ delinquency ratio stood at 1.07%. We have implemented proactive measures in all stages of our operations to ensure full control over credit risk management in the long-run. These measures include raising requirement thresholds for loan applicants, offering loans with more flexible repayment schedules to increase the transaction volume of high quality borrowers, and recording additional provisions related to credit risk. In addition, we have received approval from People’s Bank of China to connect to its credit system, which will allow us to download and submit data on borrower’s credit profile. We believe this will enhance our risk management capabilities by increasing the effectiveness of credit underwriting and a borrower’s cost of default. Furthermore, we have adopted a stringent collection policy to ensure full regulatory compliance. With these measures in place, we are confident to elevate our overall business resilience and achieve more sustainable development.”

Third Quarter 2019 Financial Results

Total net revenues increased 98% to RMB2,583.0 million (US\$361.4 million) from RMB1,302.7 million in the same period of 2018, primarily due to an increase in loan facilitation service fees, post origination service fees and financing income associated with an increase in loan origination volume.

Revenue from loan facilitation services increased 40% to RMB1,318.2 million (US\$184.4 million) from RMB943.8 million in the same period of 2018, primarily due to an increase in loan origination volume through the Company’s platform.

Revenue from post-origination services increased 180% to RMB573.2 million (US\$80.2 million) from RMB204.5 million in the same period of 2018, primarily due to an increase in loan origination volume and the cumulative effect of loans originated during prior periods through the Company’s platform.

*Financing income*⁷⁸ increased 439% to RMB409.8 million (US\$57.3 million) from RMB76.0 million in the same period of 2018, primarily due to an increase in loan origination funded by our consolidated trusts. Financing income was recognized over the lifetime of the loans, therefore its growth rate lagged the growth rate of on-balance sheet loans.

Other service fee revenues increased 260% to RMB281.9 million (US\$39.4 million) from RMB78.4 million in the same period of 2018, primarily due to an increase in revenue from referring borrowers to other platforms and an increase in release of guarantee liabilities upon expiry of the underlying loans and late fees from borrowers.

Total operating costs and expenses increased 212% to RMB1,640.7 million (US\$229.5 million) from RMB525.3 million in the same period of 2018.

Origination and servicing expenses increased 114% to RMB374.3 million (US\$52.4 million) from RMB174.8 million in the same period of 2018, primarily due to an increase in loan origination volume and the associated costs incurred to originate and service loans through the Company’s platform.

Sales and marketing expenses increased 274% to RMB902.9 million (US\$126.3 million) from RMB241.4 million in the same period of 2018, primarily due to an increase in advertising expenses to promote the Company’s brand and attract users to the platform.

General and administrative expenses increased 84% to RMB113.7 million (US\$15.9 million) from RMB61.7 million in the same period of 2018, primarily due to an increase in salaries and benefit and related expenses for employees engaged in general corporate functions.

Provision for loans receivable increased 1268% to RMB151.0 million (US\$21.1 million) from RMB11.0 million in the same period of 2018, primarily due to an increase in loan origination funded by consolidated trusts and the company’s proactive increase of provisions related to credit risk.

Provision for financial assets receivable increased 243% to RMB44.6 million (US\$6.2 million) from RMB13.0 million in the same period of 2018, primarily due to an increase in loan origination volume.

Provision for accounts receivable and contract assets increased 133% to RMB54.2 million (US\$7.6 million) from RMB23.3 million in the same period of 2018, primarily due to an increase in loan origination volume.

Income from operations increased 21% to RMB942.4 million (US\$131.8 million) from RMB777.4 million in the same period of 2018.

Non-GAAP income from operations increased 15% to RMB964.7 million (US\$135.0 million) from RMB841.4 million in the same period of 2018.

Operating margin was 36.5%. **Non-GAAP operating margin** was 37.3%, compared with non-GAAP operating margin of 64.6% in the same period of 2018.

Income before income tax expense increased 18% to RMB922.4 million (US\$129.1 million) from RMB783.2 in the same period of 2018.

Income tax expense was RMB189.0 million (US\$26.4 million), compared with RMB205.7 million in the same period of 2018.

Net income increased 27% to RMB733.5 million (US\$102.6 million) from RMB577.4 million in the same period of 2018.

Non-GAAP net income increased 18% to RMB755.8 million (US\$105.7 million) from RMB641.5 million in the same period of 2018.

Net income margin was 28.4%. **Non-GAAP net income margin** was 29.3%, compared with non-GAAP net income margin of 49.2% in the same period of 2018.

8 "Financing income" is generated from loans originated through the Company's platform funded by the consolidated trusts and Fuzhou Microcredit, which charge fees and interests from borrowers.

Use of Non-GAAP Financial Measures Statement

To supplement our financial results presented in accordance with U.S. GAAP, we use non-GAAP financial measure, which is adjusted from results based on U.S. GAAP to exclude share-based compensation expenses. Reconciliations of our non-GAAP financial measures to our U.S. GAAP financial measures are set forth in tables at the end of this earnings release, which provide more details on the non-GAAP financial measures.

We use non-GAAP income from operation and non-GAAP net income in evaluating our operating results and for financial and operational decision-making purposes. Non-GAAP income from operation represents income from operation excluding share-based compensation expenses, and non-GAAP net income represents net income excluding share-based compensation expenses. Such adjustments have no impact on income tax. We believe that non-GAAP income from operation and non-GAAP net income help identify underlying trends in our business that could otherwise be distorted by the effect of certain expenses that we include in results based on U.S. GAAP. We believe that non-GAAP income from operation and non-GAAP net income provide useful information about our operating results, enhance the overall understanding of our past performance and future prospects and allow for greater visibility with respect to key metrics used by our management in its financial and operational decision-making. Our non-GAAP financial information should be considered in addition to results prepared in accordance with U.S. GAAP, but should not be considered a substitute for or superior to U.S. GAAP results. In addition, our calculation of non-GAAP financial information may be different from the calculation used by other companies, and therefore comparability may be limited.
